Examples of work available upon request.

Leverage progressive experience managing projects and developing innovative web-based solutions. Plan and coordinate complex web development projects from initial requirements through architecture, configuration, and implementation. Combine expertise in strategic planning and quality assurance with strong qualifications in team leadership. Outstanding interpersonal and communication skills; able to quickly build rapport with clients, colleagues, and senior management.

Skills

Linux, Apache, NGINX, MySQL, PostgreSQL, PHP, HTML5, CSS3, JavaScript, jQuery, REST and SOAP API development

Worked in the Yii, Laravel, and Codeigniter MVC environments as well as the Bootstrap and Foundation frontend frameworks.

Experienced with GIT, NPM, Bower, Composer, and Docker

Experience

Sourcetoad / Senior Software Engineer

Aug 2014 - Sept 2018, Tampa, Florida

Responsible for leading team tasked with building and maintaining flagship product designed to provide local and remote control of assets, data, and IOT devices aboard cruise ships. Worked directly with clients to establish project needs and requirements, addressed concerns, and software deployment on site.

- Designed and developed custom solutions to meet project needs such as database design, deployment protocol, api interactions with multiple third party sources including onboard systems, and persistent synchronization of data between multiple sources
- Managed project scope and development planning, directing the efforts of team to finish necessary task and accomplish sprint goals

AKT Studios / Lead Web Developer

May 2013 - Aug 2014, Orlando, Florida

Responsible for rebuilding of internal systems primarily intent on bringing them up to current best practice and modern development standards. Streamlining business operations in regards to online store-front management, E-Commerce platform, and sales management system.

- Led the redevelopment of main online storefront system; converted it from a home grown platform to a standard framework
- Created and maintained reporting systems for the sales management team; overall view of currently active clients, reporting on sales, managing leads, and calculating sales team specific commission rates

Winley Marketing / Lead Web Developer

May 2011 - May 2013, Atlanta, Georgia

- Created and maintained reporting systems for the accounting department
- Devised and implemented policies on best coding practices and setup of servers / domains
- Instrumental member of team that rebuilt existing reporting and management systems into a Yii environment; managed all front-end requirements, JavaScript integration, and assisted with database design.
- Led development of SMS Shortcode systems; built API for affiliates and in-house reporting systems

Nutrifit / Lead Developer

April 2012 - December 2012, Atlanta, Georgia

- Directed all aspects of development projects for this startup company; planned and executed design and development of sales pages. Supervised 3 front-end developers during design and development of pages and graphics for production of E-Commerce store

Homerede / Web Developer

Jan 2011 - April 2011, Orlando, Florida

- Instrumental in development of new system focused on searching for customer services and management of various client metrics, including life, bills, finance, and insurance claimed

DRJ Designs / Web Developer

July 2010 - Jan 2011, West Plains, Missouri

- Led all phases of development; prioritized workflow and allocated resources to ensure attainment of client requirements and meet aggressive timelines, thereby surpassing expectations

Global Net Designs / Web Developer

Nov 2009 - July 2010, Springfield, Missouri

- Created customized websites from the ground up based on client specifications; consistently delivered exceptional service, which facilitated ongoing business

---

Education

Full Sail University / BS in Digital Arts & Design

Aug 2007 - July 2009, Winter Park, Florida

Awards

- Recognized at Sourcetoad for excellent client relations and consistently meeting or exceeding expectations for quality of work
- Recognized at Winley Marketing for outstanding contributions; consistently remained ahead of schedule and frequently assisted with front-end development following successful completion of backend software development tasks
- Student teacher at Full Sail University, assisting with the 3D Modeling and Game Development classes
- Eagle Scout Award
